

Renewable and low-carbon fuels for climate-smart EU agricultural machinery: **Circular Agriculture in action**

31st Member's Meeting of the "Club of Bologna"

Mario De Amicis, Nov 12th

As CNH Industrial, we are ready to
face the challenges in front of us
and to **contribute** to a

Sustainable Development of Agriculture.

The **European Green Deal** includes the first European climate law to become **climate neutral by 2050**.

Emissions

Sustainable
mobility

Innovation in the
agricultural sector

The ***Farm to Fork Strategy*** is at the heart of the EU Green Deal
aiming to make food systems
fair
healthy
and **environmentally-friendly**

Case IH – Raven Industries: first autonomous spreader Trident 5550.

T6 Methane Power Stage V.

We believe that **Innovation**, **Sustainability** and **Productivity** shall guide us to achieve a circular and more sustainable agriculture.

CNH Industrial **Alternative Fuels Strategy**

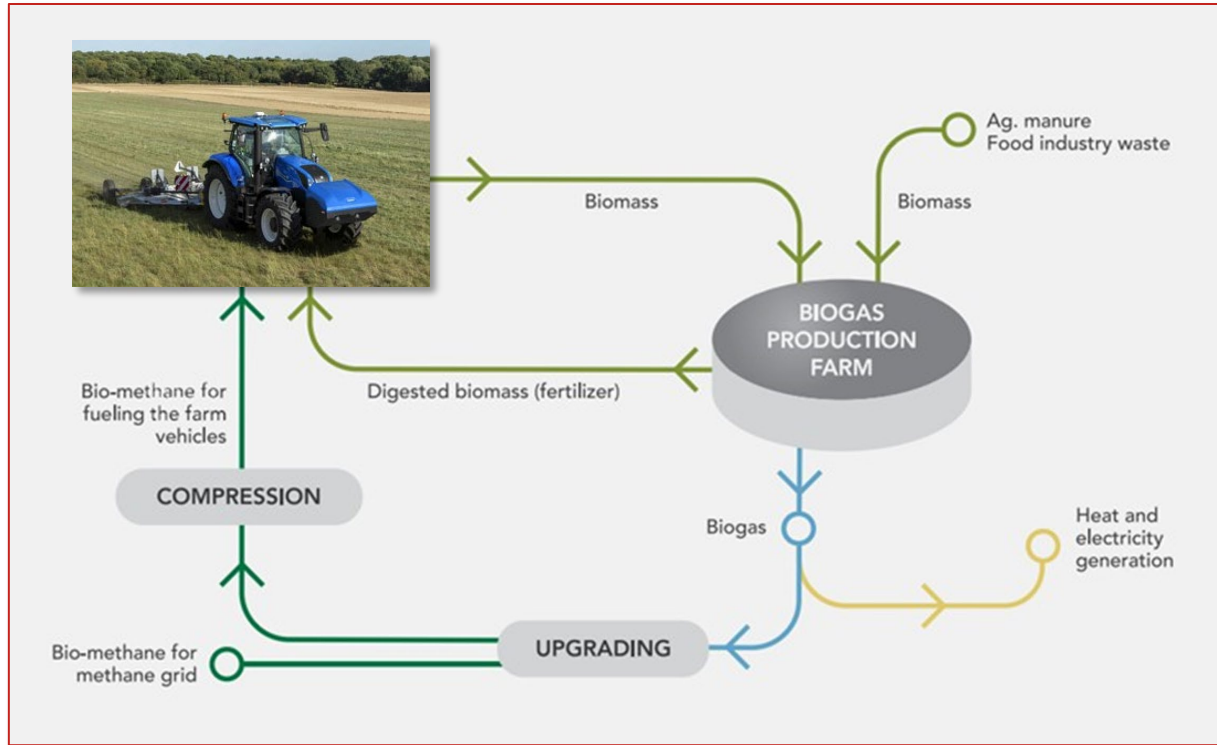

Biomethane

The **New Holland T6Methane Power** is the first world's 100% methane powered production tractor and is key to CO2 reduction without compromising performance.

- New Holland's **Clean Energy Leader strategy**
- New Holland's **Energy Independent Farm Concept**
- CNH Industrial acquired a minority stake in **Bennemann Ltd**

The Road to **Carbon Neutral Farming**

CNH Industrial **Alternative Fuels Strategy**

Electrification

Electrified vehicle technologies represent the **next step in the Company's decarbonization strategy.**

Light Electrification

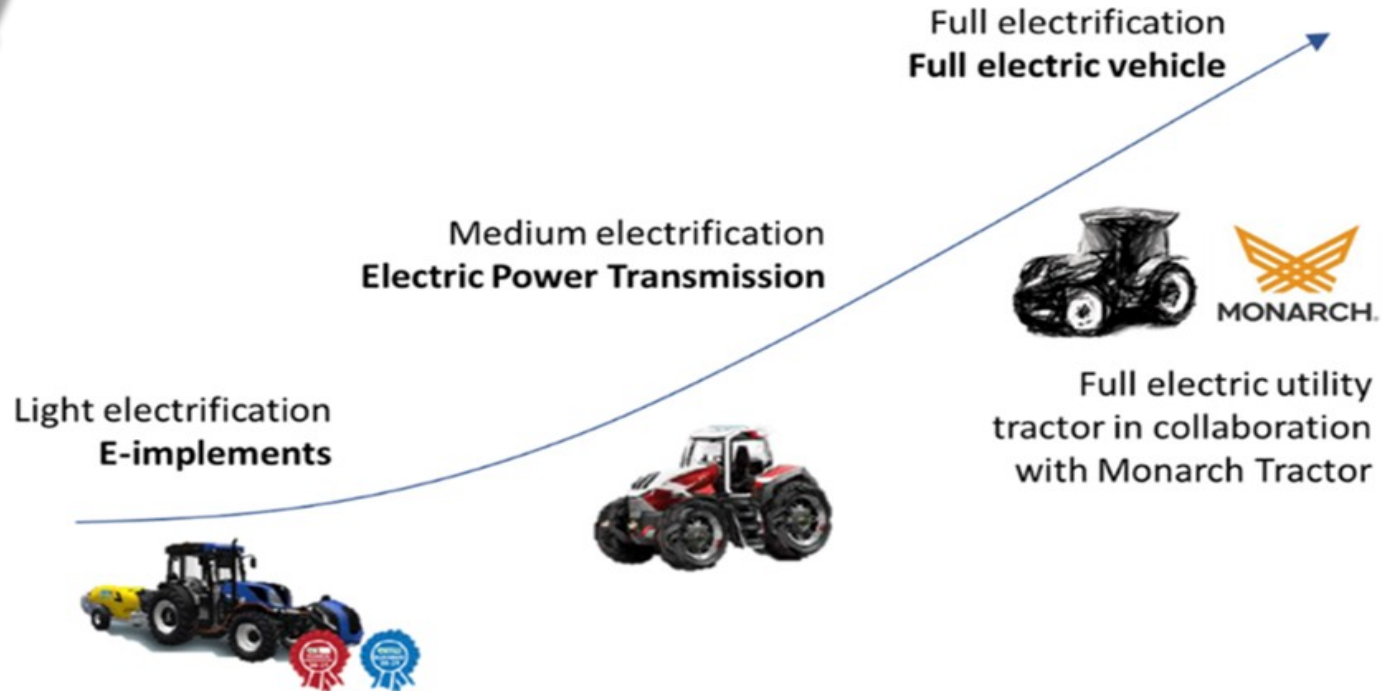

Medium Electrification

Full Electrification
